

MUTHUKRISHNAN P

Backend Developer

+91 9786337914 | muthukrishnanpr@gmail.com | [Muthukrishnan P](#) | Villupuram, Tamil Nadu, India

PROFESSIONAL SUMMARY

Backend Developer with 5.5+ years of experience building secure, maintainable, production-grade web applications and REST APIs using Symfony, PHP, CodeIgniter, Node.js, Express.js, MySQL, MongoDB, Doctrine ORM, and API Platform. Strong in API architecture, authentication, database design, migrations, validation, third-party integrations, reporting workflows, and legacy modernization. Experienced in weather, climate, logistics, healthcare, inspection, and business management systems with a focus on clean architecture, performance, and reliable backend workflows.

TECHNICAL SKILLS

- Backend:** PHP, Symfony, CodeIgniter, Node.js, Express.js, REST APIs, API Platform, Doctrine ORM, Symfony Console
- Database:** MySQL, MongoDB, Doctrine Migrations, Schema Design, Query Optimization, Data Modeling
- Security & Auth:** JWT Authentication, Role-Based Access Control, Validation, CORS, Rate Limiting, Secure API Responses
- Integrations:** Swagger/OpenAPI, Scalar API Reference, Authorize.Net, Razorpay, Email/Mailer, File Uploads, PDF/Excel Generation
- Architecture:** MVC, Service Layer, Repository Pattern, DTO/Serialization, Event Subscribers, Middleware, Clean Code
- Testing & Tools:** PHPUnit, Jest, Supertest, Postman, Git, GitHub, Composer, npm, Swagger UI, VS Code
- Frontend Awareness:** React.js, TypeScript, Twig, Bootstrap, Vite, Webpack Encore

PROFESSIONAL EXPERIENCE

- Senior Web Developer – Semansys IT Services Pvt Ltd**
Puducherry, India
Tech Stack: Symfony, PHP, CodeIgniter, Node.js, Express.js, MySQL, MongoDB, Doctrine ORM, API Platform, JWT, REST APIs
 - Designed and developed secure REST APIs and backend modules for enterprise, geospatial, weather, healthcare, logistics, and business workflow platforms.
 - Built Symfony applications with controllers, services, entities, repositories, Twig integration, validation workflows, event subscribers, and Doctrine-based persistence.
 - Implemented authentication, role-based access, standardized API responses, request validation, error handling, and reusable backend utilities.
 - Designed database schemas, migrations, reporting queries, and optimized backend workflows for maintainability and performance.
 - Integrated third-party services including payment gateways, email services, file uploads, PDF/Excel exports, API documentation, and external data feeds.
 - Maintained and modernized legacy CodeIgniter applications while migrating selected workflows into Symfony-based architecture.

Feb 2022 – Present
- UI Designer – CADD Center**
Theni, Tamil Nadu
Tech Stack: HTML, CSS, JavaScript, Responsive Design
 - Built responsive frontend pages and collaborated with developers to integrate UI screens with backend modules.
 - Gained practical experience in user workflows, form behavior, and browser-based application delivery.

Jul 2021 – Feb 2022

SELECTED BACKEND PROJECTS

- API25 – NCM API Platform**
Tech Stack: Symfony 8, PHP 8.4, API Platform, Doctrine ORM, Lexik JWT, Nelmio CORS, PHPUnit, OpenAPI/Scalar

- Developed a modern Symfony API platform using API Platform, Doctrine ORM, serializer, validator, security bundle, and JWT authentication.
- Built structured API resources, validation rules, authentication flows, CORS handling, and documented endpoints for frontend and third-party consumption.
- Implemented automated test support using PHPUnit, BrowserKit, HTTP Client, functional tests, unit tests, and coverage workflows.
- Worked with XML/weather sample data, email templates, documentation pages, and secure API routing for a centralized NCM service layer.

BPMC Migration – CodeIgniter to Symfony

Tech Stack: Symfony 7.4, PHP 8.3, Doctrine ORM, Doctrine Migrations, API Platform, JWT, MySQL, Messenger, Mailer, Vite

- Rebuilt a legacy Backporch Mail Center CodeIgniter portal into a modern Symfony multi-domain application covering admin, customers, reports, tools, and API modules.
- Migrated legacy database workflows into Doctrine entities, migrations, service classes, role/module permissions, and structured Symfony routing.
- Implemented backend modules for customers, packages, rents, reports, warehouse inventory, email templates, quoting, deliveries, and user/role management.
- Integrated Authorize.Net, JWT authentication, Symfony Messenger, Mailer, file handling, PDF/Excel generation, and API documentation.
- Improved maintainability by separating business logic into services, standardizing validation, modernizing security, and replacing legacy procedural patterns.

UBM – MERN Business Management API

Tech Stack: Node.js, Express.js, TypeScript, MongoDB, Mongoose, JWT, Jest, Supertest, Razorpay, Nodemailer

- Built a TypeScript Express/MongoDB backend API for business workflows including users, customers, products, orders, invoices, payments, reports, settings, and file management.
- Implemented JWT authentication, password hashing, sanitization, rate limiting, CORS, XSS protection, validation, and secure middleware.
- Integrated Razorpay payments, Nodemailer emails, QR generation, PDF generation, Excel/CSV processing, and file uploads with Multer.
- Added Jest and Supertest coverage for users, dashboard, products, orders, payments, reports, settings, security, stress, and file manager workflows.

Hernia Score Platform

Tech Stack: Symfony 7, PHP 8.2, Doctrine ORM, Twig, Webpack Encore, MySQL

- Developed backend workflows for a healthcare scoring platform using Symfony controllers, Doctrine ORM, services, templates, and application constants.
- Implemented request handling, routing, persistence, validation-oriented workflows, and production-ready Symfony configuration.
- Supported frontend integration through Twig and Webpack Encore while maintaining clean backend separation.

AI Bahar Weather Platform

Tech Stack: Symfony 7.2, PHP 8.3, Doctrine DBAL, Twig, Security Bundle, Translation, Monolog

- Built and maintained Symfony backend services for maritime weather pages including observations, warnings, tropical storms, NWP maps, and data-layer configuration.
- Implemented Symfony routes, controllers, Twig templates, translation resources, security configuration, event subscribers, and utility classes.
- Integrated weather data configuration files and map layer metadata into user-facing workflows through structured backend support.

Maalem Inspection System

Tech Stack: Symfony 7.3, PHP 8.3, Twig, Mailer, Security CSRF, YAML/JSON Content, Webpack Encore

- Developed Symfony backend modules for inspection services, clients, partners, career forms, contact workflows, menus, and reusable Twig runtime extensions.

- Implemented Mailer integration, CSRF-protected form flows, static JSON content services, page controllers, and reusable application utilities.
- Supported deployment-ready build scripts combining Composer, Symfony, Webpack Encore, and optimized production packaging.

CORE BACKEND STRENGTHS

- Symfony API and application development
- REST API architecture and documentation
- Doctrine ORM, migrations, and database design
- JWT authentication and role-based access control
- Legacy CodeIgniter to Symfony modernization
- Node.js/Express/MongoDB API development
- Payment, email, file, PDF, Excel, and external service integrations
- Testing, debugging, performance tuning, and maintainable service design

EDUCATION

Bachelor of Engineering – Mechanical Engineering

Theni Kammavar Sangam College of Technology (TKSCT), Theni | 2016 – 2019

DECLARATION

I hereby certify that the information provided in this resume is true, accurate, and complete to the best of my knowledge. I declare that I have not concealed or misrepresented any facts that are material to this application.

I understand that any inaccuracy or omission in the information provided may be grounds for rejection or termination of my candidature at any stage.
