

MUTHUKRISHNAN P

Frontend Developer

+91 9786337914 | muthukrishnanpr@gmail.com | [Muthukrishnan P](#) | Villupuram, Tamil Nadu, India

PROFESSIONAL SUMMARY

Frontend Developer with 5.5+ years of experience building responsive, production-grade web interfaces for weather, climate, geospatial, healthcare, inspection, and business workflow platforms. Strong in React.js, TypeScript, JavaScript, HTML5, CSS3, SCSS, Bootstrap, Twig/PHP templates, REST API integration, multilingual UI, interactive maps, dashboards, and frontend performance optimization. Experienced in converting complex domain workflows into clean, maintainable, user-friendly interfaces.

TECHNICAL SKILLS

- Frontend:** HTML5, CSS3, SCSS, JavaScript, TypeScript, React.js, React Hooks, Responsive Web Design, Cross-Browser Compatibility
- UI & Styling:** Bootstrap 5, Tailwind CSS, Twig Templates, PHP Templates, Component-Based UI Development
- State & API Integration:** Recoil, React Router, Context API, REST APIs, Axios, Fetch, JSON, Form Validation
- Maps & Dashboards:** MapLibre GL, Mapbox GL, Leaflet, Turf.js, amCharts, DataTables, Interactive Data Visualization
- Build Tools:** Webpack Encore, Vite, pnpm, Yarn, npm, ESLint, TypeScript, Browser Compatibility, Asset Bundling
- Backend Awareness:** Symfony, PHP, CodeIgniter, Node.js, Express.js, MySQL, MongoDB, Swagger UI

PROFESSIONAL EXPERIENCE

- Senior Web Developer – Semansys IT Services Pvt Ltd** Feb 2022 – Present
Puducherry, India
Tech Stack: React.js, TypeScript, JavaScript, HTML5, CSS3, SCSS, Bootstrap, Twig, Symfony, PHP, REST APIs, MapLibre GL, Webpack Encore, Vite
- Developed responsive frontend modules for enterprise and public-facing platforms across weather, climate, geospatial, healthcare, inspection, and logistics domains.
 - Built React and TypeScript interfaces with reusable components, API-driven pages, form workflows, dashboards, map layers, filters, modals, and multilingual content.
 - Integrated frontend applications with Symfony, PHP, CodeIgniter, and Node.js APIs using REST calls, validation flows, token-based access, and JSON data handling.
 - Implemented SCSS architecture, Bootstrap layouts, asset bundling, browser compatibility fixes, and production builds using Webpack Encore and Vite.
 - Improved UI maintainability by standardizing shared layouts, navigation patterns, frontend helpers, translation-aware structures, and reusable components.
 - Debugged production UI issues, optimized rendering for map-heavy and dashboard-heavy screens, and supported continuous feature enhancement.
- UI Designer – CADD Center** Jul 2021 – Feb 2022
Theni, Tamil Nadu
Tech Stack: HTML, CSS, JavaScript, Responsive Design, UI/UX
- Built responsive web pages and UI components using HTML, CSS, and JavaScript.
 - Converted design concepts and wireframes into functional frontend layouts with attention to spacing, typography, and usability.
 - Tested interfaces across browsers and screen sizes to maintain mobile responsiveness and consistent user experience.

SELECTED FRONTEND PROJECTS

Al Bahar – Maritime Weather Intelligence Platform

Tech Stack: React.js, TypeScript, SCSS, Bootstrap, MapLibre GL, Turf.js, amCharts, i18next, Symfony, Webpack Encore

- Built frontend modules for maritime weather layers, observations, warnings, tropical storm views, and NWP map workflows.
- Implemented interactive MapLibre GL interfaces with layer controls, time-based playback, zoom tools, and geospatial helper utilities.
- Developed responsive English/Arabic UI with i18next, SCSS, Bootstrap, shared helpers, secured API utilities, and production asset builds.

Earthquakes Monitoring Platform

Tech Stack: React.js, TypeScript, SCSS, MapLibre GL, Mapbox Draw, Turf.js, DataTables, i18next, PHP, Webpack Encore

- Developed a seismic monitoring UI with map-based earthquake events, seismic zones, faults, stations, reports, and catalogue views.
- Built desktop and mobile controls for layers, events, reports, tsunami data, stations, and zone overlays.
- Optimized data-heavy geospatial screens using React, virtualization libraries, throttled interactions, bilingual translations, and structured API integration.

Early Warnings for All

Tech Stack: React.js, TypeScript, SCSS, Bootstrap, MapLibre GL, React Router, React Window, i18next, PHP, Webpack Encore

- Built React/TypeScript features for map views, disaster data, warning information, layer controls, routing, reusable helpers, and API hooks.
- Implemented responsive and Arabic-ready UI using SCSS, Bootstrap, custom fonts, translation resources, and right-to-left friendly layouts.
- Integrated warning datasets and data feeds into frontend workflows for operational monitoring and public awareness.

WMO President Portal

Tech Stack: TypeScript, SCSS, Bootstrap, PHP Templates, Symfony Translation, Webpack Encore

- Implemented responsive public-facing pages for president profile content, governance, gallery, contact, quotes, member data, and static content.
- Created reusable UI patterns for headers, footers, modal views, scrolling behavior, news ticker sections, and responsive content blocks.
- Managed multilingual templates, TypeScript behavior, Sass styling, linting, and Webpack Encore asset compilation.

Polar Research Portal

Tech Stack: React.js, TypeScript, SCSS, Bootstrap, Mapbox GL, PHP Templates, Symfony Translation, Webpack Encore

- Built UI modules for static content pages, navigation, latest news, committee data, map content, media sections, and research information.
- Integrated JSON and GeoJSON content into responsive pages using Bootstrap, SCSS, TypeScript, React-enhanced behavior, and Mapbox GL.
- Supported English/Arabic content rendering and production builds using pnpm, Webpack Encore, TypeScript, and asset workflows.

UBM – Business Management Dashboard

Tech Stack: React.js, TypeScript, Vite, Tailwind CSS, React Context, REST APIs, Node.js, MongoDB

- Built a React/Vite dashboard with reusable UI components for customers, products, orders, invoices, payments, settings, users, and reports.
- Implemented protected routes, app layout, sidebar navigation, dialogs, forms, image uploads, invoice views, pagination, and responsive dashboard cards.
- Added frontend test coverage for pages, contexts, hooks, and user workflows to improve reliability and maintainability.

ADDITIONAL FRONTEND WORK

- Maalem Inspection System: Built Symfony/Twig frontend pages, mobile navigation, service sections, client/partner content, career/contact forms, MapLibre GL map views, and amCharts visualizations.

- Hernia Score Platform: Developed Symphony/Twig and React-enabled UI workflows for healthcare scoring, responsive templates, forms, and production Webpack Encore builds.

CORE FRONTEND STRENGTHS

- React.js and TypeScript frontend development
- Responsive, mobile-first UI implementation
- Interactive geospatial map interfaces
- Dashboard, form, table, modal, and workflow-heavy screens
- REST API integration and frontend data handling
- Multilingual and Arabic-ready UI development
- SCSS, Bootstrap, Tailwind CSS, and component-based styling
- Webpack Encore, Vite, asset bundling, and frontend build optimization

EDUCATION

Bachelor of Engineering – Mechanical Engineering

Theni Kammavar Sangam College of Technology (TKSCT), Theni | 2016 – 2019

DECLARATION

I hereby certify that the information provided in this resume is true, accurate, and complete to the best of my knowledge. I declare that I have not concealed or misrepresented any facts that are material to this application.

I understand that any inaccuracy or omission in the information provided may be grounds for rejection or termination of my candidature at any stage.
